

PJ DeBisschop (8 hours)

- Continuing to add unit tests for the remaining database tables. Currently doing my best to focus on the ones we currently need. And update the rest as we use them.
- Found an issue with the database. Because we auto increment most of our tables if we delete a row we will need to reset the identities accordingly.

Sebastian Kazun (12 hours)

- Added role functionality to login as well as a default admin account that is created on startup
- Added confirmation email functionality. Need to create website email to send from.
- Added password reset functionality.

Thien Nguyen (9 hours)

- Finished up gravatar retrieval
- Started retrieving html posts for the pages
- Started working on the homepage

Cole Mulligan (8 hours)

- Can now create and view all of the posts in the database, will need to work to add default values upon account creation to separate blogs.
- Cleaned up the admin menu and added useful links.
